

Here is a classic center hall design with formal living and dining rooms. There's a conveniently located powder room, a big family room with a fireplace and sliding glass doors. The U-shaped kitchen work area is brightened by a garden/greenhouse window. Upstairs, the luxurious master suite includes an 18-foot bedroom, a walk-in closet, a dressing room with its own vanity sink and a complete bath. A second full bath serves the other 3 bedrooms, and there are two linen closets and a convenient laundry chute. This home includes a full basement, double garage, wall to wall carpeting, a heat pump/air conditioning system, storm windows and insulation package (R30 ceilings, R13 walls).
